

Tsegelnik Bogdan

React | React Native Developer

PROJECTS

Gather Care

apps.apple.com/us/app/gather-care/id6447639582

React Native React.js Redux Toolkit Redux.js JavaScript Jest SCSS CSS HTML Git

The project creating a small social network to help people in need. I was not the first developer on this application, so the backbone was not created by me. During my work, I fixed bugs, made minor design changes and added several new features under the guidance of the technical lead.

PET PROJECTS

Internship project

github.com/winfar3/onix-internship

JS ES6 React.js Props/PropTypes Eslint Hooks HOC Reconciliation

Project for internship training. The goal is to learn React and Redux, implement blog functionality. I started with layout in components. As I studied and acquired new knowledge, I added functionality, optimized functions, and improved the codestyle. The mentor checked the work, pointed out errors and suggested how to improve the application. Practice and better understanding of working with git and github.

Todo list

github.com/winfar3/pet-project-todo-list

JS ES6 TypeScript React.js Props Hooks

A simple typescript to-do list based on YouTube tutorials. The goal is to try typescript in practice, strengthen understanding of React, write own to-do list. Additionally added sorting and task importance.

EXPERIENCE

React Native developer

Onix-Systems | August 2022 - December 2023

React Native React.js Redux Toolkit Redux.js TypeScript JavaScript Jest SCSS CSS
